Primary Reason Illinois Industrial Commission Subpoena

A new Primary Reason, Illinois Industrial Commission Subpoena, has been added for the Major Class of GOV, Requester Type of Government, for sites in Illinois, Indiana, and Ohio.

Healthjump Integration *Phase 1*

With the recent acquisition of Healthjump, users may see requests that originate in ChartFinder and are fulfilled and delivered by Healthjump. These requests are shown in HealthSource for internal tracking/reporting purposes only. The requests are in *view-only* mode and cannot be edited. Users do not need to take any action on these requests. An example of the History screen for a sample request is below.

eRequest History

Patient Name: fistSTF dummylastDA   **Patient Account Number:** N/A

eRequest ID: 11569064   **Site:** 20080

User Experience & Technical Enhancements

User Type (End-User, Administrator, Technical)	Area	Problem/Error Solution implemented/amended behavior	Reference #
End-User	DF, IEX Epic ROI API	Requests cancelled in HealthSource when in the Digital Fulfillment Review status are not cancelled in the Epic ROI system Now the Rhapsody call has been updated with the cancellation so it will be sent to Epic ROI system	67748
End-User	DF, IEX Epic ROI API	Requests are cancelled erroneously when changed from Digital Fulfillment status to a Fulfillment status The non-EMR patient flag now changes to N on create release on the successful creation of the epic ROI ID	69296
End-User	IEX Epic ROI ID	When a request is created manually (for testing), the Epic ROI ID is not displayed on the Request screen but is in the History screen. Now, the ROI ID is displayed.	69615
Technical	Digital Fulfillment	The internal Fulfillment Type logic has changed to be based on the first Fulfillment entry instead of the fulfillment entry with the most pages (released with 8.20 on 10/5/23_	69528
Technical	Security	Image vulnerability changes	70065
Technical	Smlog	Changes to the smlog_requester_type to identify HEDIS vs. RADV Reason for Requests	69864
Technical	HealthJump integration- API	Requests (received via Chart Finder) that have already been *fulfilled and delivered* by the Healthjump system are electronically created in HealthSource as a Standard request type. The Request Letter and MR can be viewed since they are contained in the Common Document Repository (CDR). • A new create request API has been created in EIP services to create a Healthjump request in HS • The created request will be in the Delivered status with the provided request details on the read-only screen. If the Major Class, and/or Reason for Request is sent to HS, it will display (ex: PAYD & MRA).	69939

User Type (End-User, Administrator, Technical)	Area	Problem/Error Solution implemented/amended behavior	Reference #
		• Request will not be available in workflow/Back office (No Request ID/Log ID will be created). • The existing create/update/submit API class file is reused. • Service account with Electronic Integration Role, User Type of Internal, and Application of HealthJump * User Type: Internal * Application: Health Jump • ChartFinder project type is 'Alignment' *(see table below)*
