

10.10 HealthSource Release Notes

Last updated by  **Jim Bartolotta** • an hour ago

Release Information

Release – Thursday November 14th at 6:30am EDT until 7:30am EDT

Release Summary

We have introduced a enhancement to the Platform Admin interface, enabling self-service configuration of AutoFax settings at the site level. This addition gives administrators more direct control over their AutoFax setup without requiring additional support. Additionally, we've improved our integration with the Digital team by passing dates of service information from the HealthSource UI. All DOS options selected within the interface are now seamlessly transmitted to Digital via the API, enabling more accurate date calculations in their processes.

User Experience & Technical Enhancements

User Type (End-User, Admin, Tech, etc)	Area	Problem/Error Solution/New Behavior	Jira Ref #
Tech	Digital Fulfillment	Digital Fulfillment: Add Fuzzy Dates of Logic to API	UNITY-72939
Admin	Platform Admin	Configure Autofax in Platform Admin	UNITY-72972
